phonetinus_ is a piece for any number of performers and audience members with either smartphones, tablets, or laptops. each participant should scan a QR code (provided in this EPK), copy a YouTube link from the chart below, or search on YouTube for 'phonetinus'. there are 10 different parts for the piece, and an effort should be made to have an equal distribution of the parts. each QR code is slightly different and will link to one of 10 videos hosted on my channel.

it is possible to give a unique performance of 'ponetinus_' by using SuperCollider on several laptops and have each computer run the same part. random occurrences within the patch would generate unique sequences for each instance of that particular species of digital firefly.

PROGRAM NOTE

'phonetinus_' is a piece for any number of cellphones, tablets, and laptops. each performer becomes a member of a species of digital firefly and is encouraged to move around the performance space to experience the unique sights and sounds of the cluster performance. 'phonetinus_' was made possible with the generous support of the University of Pittsburgh's Humanities Center and the Pittsburgh Parks Conservancy.
